National Agriculture Policy

481. DR. MOHAN BABU: Will the PRIME MINISTER be pleased to state:

(a) whether Government propose to formulate a National Agriculture Policy;

(b) if so, what are the salient features of the proposed policy and time by which it would be finalised;

(c) whether it is a fact that experts have advised Government for close interaction between the corporate sector and the farming community all over the country; and

(d) if so, to what extent the advice of experts is likely to help the farmers?

THE MINISTER OF STATE IN THE MINISTRY OF AGRICULTURE (SHRI SOMPAL): (a) and (b) A National Policy on Agriculture is a final stage of drafting. It aims at the management and conservation of the natural resources base through sustainable management of land and water resources. It seeks to promote environmentally non-degrading, technilcaly sound, economically viable and socially acceptable improvement of natural resoruces to promote sustainable development of agriculture.

The Policy will, to this end, seek to achieve:

— conservation of the natural resource base through sustainable management of land and water resources and protection and conservation of bio-diversity;

— maintenance of food self-sufficiency;

— greater employment generation, higher household incomes and reduction of poverty through diversification of farming systems;

— reduction of regional imbalances through greater emphasic on rainfed farming and developing areas of untapped potential;

— strengthening of agricultural rescarch & education;

— restructuring of agricultural extention to make it more demanddriven and farmer accountable;

— efficient use of inputs;

— expansion of the rural infrastructure through increased public and private sector investment;

— remunerative prices for agricultural produce through strengthening marketing institutions and infrastructure and creation of a favourable economic environment for the growth of the agriculture sector;

— value addition to farm produce through agro-processing and improved post-harvest facilities;

— revitalization of the rural credit institutions and linking credit with insurance to augment the flow of credit for agricultural and rural sector;

— higher agricultural exports and integration of the Indian commodity markets with global markets;

— creating quality consciousness among farmers and agro-processors and development of facilities for quality testing;

— benefits to the agriculture sector at par with industry;

— greater participation of user communites;

— safeguarding the interests of women and weaker sections of the rural community;

— land reforms that lead to higher productivity with equity.

(c) and (d) Suggestions have been received from time to time from different quarters on different aspects of agriculture policy. The National Policy on Agriculture will seek to encourage collaboration between the cooperative agriculture sector and the corporate sector to promote agro-processing industry to help the farmers to realize a higher value for their produce.
